# Accreditations

## Comprehensive quality management system in compliance with ISO 9001:2008

Confoil's comprehensive quality management system encompasses all aspects of our administration, manufacturing, distribution and sales activities for consistent product and service quality.

**Certification:** AS/NZS ISO 9001:2008 standard

**Certificate:** QEC 3132

**Certified:** 9/12/93 by SAI Global

**Certification:** FSSC22000 V3

**Certificate:** FSM 40401

**Certified:** 25/11/14 by SAI Global.

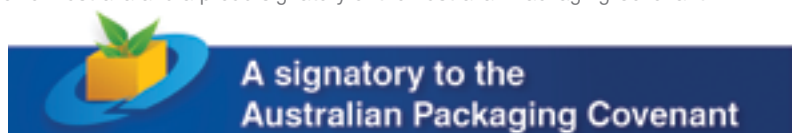

## Confoil aluminium foil containers and Dualpak paperboard trays can be recycled.

We have launched several recycling campaigns in partnership with users to close the loop and reclaim as many materials as possible.

Every year, Confoil formally revisits plans for continuous improvement in its environmental performance through education and community awareness programs, product development and design, recycling and disposal, and warehouse and distribution efficiencies.

Outcomes have minimised Confoil's environmental footprint and have been recognised by industry, with our Australian Packaging Covenant Action Plan earning a silver award from the Packaging Council of Australia.

Confoil is a member of the Packaging Council of Australia and a proud signatory of the Australian Packaging Covenant.

# confoil.co.nz

## Ordering at your convenience....

Online ordering what you want, when you want just became easier with Confoil's easy online ordering system.

## Setting up a Trade Account

If you intend to purchase from us regularly you will need to set up a Trade Account, to do this simply click on the contact us form and fill in the details and we will send you a trade account application form.

## Once set up you can order in one of three ways:

- Call us on **0800 107 620** and place an order with one of our customer services team;
- Fax your order to your local branch (see the contents page for fax details)
- Visit our website **www.confoil.co.nz**

## One off Purchases

If you wish to make the occasional purchase there's no need to create an account. Just add the items to your shopping cart, go to 'View Basket' and select 'Checkout' when you have completed your order, you are able to pay via your credit card.

# Custom solutions

Many of Confoil's products can be custom printed to increase your branding and help you stand out from the crowd! The printing is able to be single or multi coloured, with a random or registered print depending on the application.

While often considered expensive, there are many ways to create a custom product that fits into your budget, start with a single colour logo or design which will allow you to increase your brand awareness among customers while keeping your budget in check.

We are not limited to parchment muffin wraps and Dualpak paperboard products; our aluminium foil trays and pop up sheets can also be printed with a company colour, logo or cooking instructions.

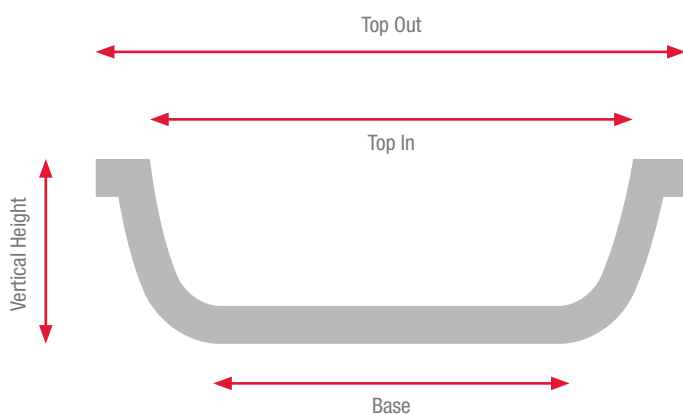

Using a block colour print on a tray or a pop up foil can help you easily identify the type of meal it contains; vegetarian, gluten free, seafood etc.

With industry knowledge and support that only a manufacturer can offer we are able to help you create a custom packaging design, refine your existing containers, or guide you through the packaging options for your product, our Confoil technicians are at hand to provide expert help.

# Product Information

**Top Out:**

When measuring containers, there are four important measurements;

The outside edges of the container, including the flange.

**Top In:**

The inside edges of the container.

**Base**

Length and width of the bottom of the container at the widest points.

**Vertical Height:**

Height from the base to top edge, not including the flange.

# Item Code Numbering

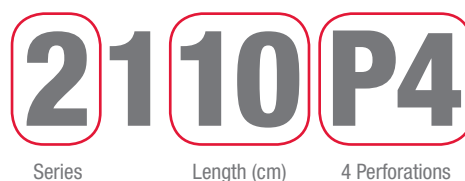

All foil containers are referred to by a 3, 4 or 5 digit number.

The product code relates directly to the SERIES, SIZE and SHAPE of the container.

FIRST number of item code = ITEM SERIES

THE LAST two numbers in a 4 or 5 digit item code = LENGTH (in three digit codes the last digit refers to the length).

Some Confoil containers have perforations (breathing holes) in the base. Perforations prevent moisture build up, and important consideration for some pastry products. A perforated item is indicated by a P, followed by the number of holes.

Muffin Wraps - see page 81

## SIZE INDEX

Our aluminium foil containers, smoothwall trays, and Dualpak meal trays are broken down into their series and listed by their outer dimensions in ascending order.

# Size Index

## CAPRAL

These are a small range of trays that Confoil still produce. Many of these sizes have been replaced by matching trays that existed already by Confoil, however some of the sizes of these trays can differ slightly and to this day some pastry dies still use the Capral sizes.

## PULP PRODUCE TRAYS

Our parchment baking dishes are compostable, biodegradable and made from 100% genuine parchment. They hold their shape during the cooking process and the siliconised coating means food releases easily. A rolled edge allows for easy denesting on production lines, and being a parchment product, they are ideal for metal detection applications.

## DUALPAK PAPERBOARD

Our Dualpak range is manufactured from pressed paperboard, resulting in a tray with natural insulation properties that will not crack when frozen. Freezable, microwaveable and conventional ovenable, Dualpak trays can be custom printed or select from our range of designs. Clip on lids are available for select sizes, or the trays can be sealed with film and heat sealing machinery.

## PULP MEAL TRAYS

Pulp trays are conventional ovenable, microwaveable and can also be frozen. The multi compartment design allows for foods to remain separate, and the polyester film lining provides a liquid barrier. Pulp trays are designed to be used with a heat sealing machine and film lidding.

## Oliver 1208 hand operated sealing machine

The 1208 sealing machine is a lightweight and compact machine perfectly sized for countertop applications.

Suitable for kitchen producing up to 75 meals per day, this machine features easy to change tray carriers and a manual film cutting system.

- When space is at a premium, the 1208 machine is the ideal choice.
- Manually operated, seals approx. 4-6 packages per minute.
- Uses continuous film rolls.
- Seals and cuts film in two easy steps.
- Self-aligning heated platen ensures a complete and even seal.
- Lightweight and compact design.
- Easy to clean and hygienic, constructed from stainless steel and durable plastic.
- Simple to operate.

machinery & films

## Oliver 1308 hand operated sealing machine

The 1308 sealing machine is a lightweight and compact machine perfectly sized for countertop applications.

Suitable for kitchen producing up to 300 meals per day, this machine features easy to change tray carriers and an effective counterweight to ensure even seals every time without operator fatigue.

- Manually operated, seals approx. 6-8 packages per minute.
- Uses continuous film rolls, unprinted or random print repeats.
- Seals and cuts film in two easy steps.
- Self-aligning heated platen ensures a complete and even seal.
- Lightweight and compact design.
- Easy to clean and hygienic, constructed from stainless steel and anodized aluminium.
- Simple to operate.

## Oliver 1808 automated sealing machine

The 1808 machine is a conveyerised, electronic automated sealing machine.

Suitable for kitchens producing up to 800 meals per day, this machine features easy to change tray carriers and a rotary knife blade system.

- Variable speed conveyor, packs between 5-27 trays per minute.
- Uses continuous film rolls, unprinted or random print repeats.
- Automatic discharge of sealed trays with adjustable discharge shelf utilising a Lexan safety guard.
- Cylindrical sealing mechanism ensures complete and even sealing of film to tray.
- Lockable castors allow for easy movement.
- Easy to clean and hygienic, constructed from stainless steel and anodized aluminium.

# Heat Sealing

machinery & films

## Oliver 1908 automated pneumatic sealing machine

The 1908 machine is a conveyerised, pneumatic, automated sealing machine, suitable for kitchen producing up to 500 meals per day.

Please note: the 1908 machine requires the use of compressed air to operate. An air compressor is not included with the purchase of the sealing machine. Required air compressor specification; 240 volt AC (AUS) 10 amps, 50 Hz (AUS), 85psi.

- Efficient intermittent motion, seals between 5-27 trays per minute.
- Uses continuous film rolls, unprinted or random print repeats.
- Automatic discharge of sealed trays with adjustable discharge shelf utilising a Lexan safety guard.
- Adjustable sealing dwell time and sealing platen force.
- Lockable castors allow for easy movement.
- Easy to clean and hygienic, constructed from stainless steel and anodized aluminium.
- Simple to operate.

## ECO PARCHMENT

Our parchment baking dishes are compostable, biodegradable and made from 100% genuine parchment. They hold their shape during the cooking process and the siliconised coating means food releases easily. A rolled edge allows for easy denesting on production lines, and being a parchment product, they are ideal for metal detection applications.

# Eco Parchment

biodegradable & compostable
