# A Legacy of Quality

**A family  
owned  
Australian  
business**

The Confoil story began over 50 years ago in 1966.

Our humble beginnings commenced as we embarked on the design and manufacturing of a wide variety of foil trays and containers, in a large array of shapes and sizes. Since that time, our diverse range of products has grown substantially, now consisting of over 350 individual food packaging items.

Foil trays and containers are still at the core of our business, however, our range has extended to include our innovative DualPak paperboard ready meal trays, pulp based products and baking moulds, just to name a few.

Confoil is a proudly 100% privately owned and operated Australian family business. To us, being local means that we are able to be responsive to our customer needs, engage as an active part of our community and support the creation and continuation of local jobs. These are contributions we are extremely proud of. Our head office and expansive manufacturing facility is located in Bayswater, Melbourne, Australia. Confoil also has operations nationally and throughout New Zealand.

# Quality Assurance & Accreditations

How safe is your food packaging?

How safe is your food packaging? This question is central to everything we do, and we believe that our customers should have complete peace of mind when they use our products.

At Confoil, you can rest assured our products are manufactured to the highest possible, globally recognised food safety standards. We are committed to creating our products with the utmost care, quality and consistency. Confoil are audited regularly by independent accreditation bodies as well as some of Australia's largest brands and are ISO and HACCP certified, ensuring has a food safety management system which has been assessed and meets the requirements of Food Safety System Certification (FSSC) 22000 (Version 4.1).

This certification ensures our products are reliable, safe, consistent and meet customer expectations. All processes used by Confoil in its approach to food safety are of the highest priority and are embedded throughout our operating and manufacturing sites. Our products are supplied to food and catering industries throughout Australia, Asia, the Pacific Islands. Offshore, we also manufacture our products at our New Zealand site.

We were awarded ISO (International Standard Organisation) endorsement by Standards Australia in 1993. The endorsement covers the manufacture and marketing of aluminium foil trays, foil wrapping, paper and paperboard products and food wrapping. Full HACCP certification was obtained in 2000 while in 2015 Confoil obtained FSSC 22000 accreditation.

The FSSC 22000 provides Food Safety Management System provides a framework for effectively managing Confoil's food safety responsibilities. FSSC 22000 is fully recognised by the Global Food Safety Initiative (GFSI).

# Created with Care

Through our environmental policy statement and objectives, Confoil is committed to minimising the impact of our activities on the environment.

Based on the foundation of “reduce, reuse, recycle and recover”; we constantly strive to maintain our high environmental standards. Our commitment to this policy emanates from our management team and permeates throughout all levels of our organisation. We monitor our performance through the regular reviews of our strategic objectives, procedures and processes.

Confoil actively works to promote recycling both internally and amongst our suppliers. We do this by sourcing and promoting product ranges and materials which minimise the environmental impact on production and distribution. Confoil are also proud signatories to the Australian Packaging Covenant and are committed to the evolving framework provided by the covenant that aims for all packaging to be either recyclable, renewable and biodegradable or compostable by 2025.

## Eco Tip!

Aluminium foil doesn't lose any of its properties in the recycling process and can be recycled over and over again.

# Join the Refoilution!

There's a Refoilution happening in the food industry...

Foil containers are at the heart of our what we do. Over 70% of what we produce, market and sell are foil containers for various uses and a variety of customers, including both wrinklewall and smoothwall options. We source and convert over 3,500 tonnes of foil each year to manufacture our high-quality packaging containers and associated foil products.

Foil containers, first invented for TV dinners in 1952, offer many functional benefits for food packaging and storage – aluminium foil itself has been manufactured for over 100 years!

Foil packaging protects food against light and air and also preserves the food quality. Furthermore, due to its production and the high temperature annealing process, it is completely sterile so is safe for use in contact with foodstuffs. Foil does not harbour or promote the growth of bacteria so it's perfect for food, cooked or raw.

Aluminium foil doesn't lose any of its properties in the recycling process and can be recycled over and over again. In fact, some 75% of all aluminium ever produced is still in use - in some form or another. What's more, recycling aluminium also saves energy when compared to what's required for its primary production.

Endlessly renewable and endlessly recyclable, the humble foil container could be the answer to meeting your food packaging needs.

## Eco Tip!

Some 75% of all aluminium ever produced is still in use - in some form or another.

# Wrinklewall Foil

## Product Footprint

 Made from quality aluminium foil, our wrinklewall trays are 100% recyclable and endlessly renewable. Aluminium can be melted and reformed over and over again without any compromise to its structural integrity. Recycling aluminium saves around 95% of the energy needed to make the metal from raw materials. Along with the energy savings, recycling aluminium also saves around 95% of the greenhouse gas emissions compared to the primary production process.

### Eco Tip!

#### Food for thought...

Did you know that foil has the best chance of being picked up during the recycling process after use if it is as clean as possible and larger foil sheets are rolled into a tennis ball size?

### Eco Tip!

Unlike single-use plastics, aluminium foil is pure in composition. It is easy to recycle through standard kerbside recycling and can be melted and reformed over and over again without any compromise to the structural properties of the material! Aluminium foil is pretty amazing stuff.

**Eco Tip!**

In addition to its sustainable properties, foil offers an absolute barrier protection for food and provides for an extended shelf-life, reducing risks of food waste at both the retail and consumer level.

# Smoothwall Foil

## Product Footprint

 Made from heavy gauge aluminium foil, our smoothwall trays are 100% recyclable and endlessly renewable. Aluminium can be melted and reformed over and over again without any compromise to its structural integrity. Recycling aluminium saves around 95% of the energy needed to make the metal from raw materials. Along with the energy savings, recycling aluminium also saves around 95% of the greenhouse gas emissions compared to the primary production process.

## Lid Compatibility

 Heat Sealable  
Designed to be used with heat sealing machinery and a compatible film lidding.

 Clip-On Lids  
Available with specific containers.

# Smoothwall Foil

## For Makers of Good Food

Our smoothwall foil trays are made from extra tough, heavy gauge aluminium with a smooth flange to accommodate heat sealing as well as clip-on lids.

Perfect for preparing, displaying and cooking chicken, fish, meat, prepared meals and deli counter ranges. Smoothwall foil is an especially popular choice for butchers and fish mongers and can even be personalised with your branding due to the fully printable surface.

### Why our customers love Smoothwall Foil

#### Quality Packaging Helps Drive Repeat Business for this High End Butcher...

For any high-end food business, product presentation is of paramount importance. And Hervey Bay's Kawungan Quality Meats was no exception. "We weren't prepared to compromise on the quality of our product packaging and searched high and low to find packaging which would do the job we needed. Once we found Confoil's Smoothwall aluminium trays, we knew we'd finally found a winner. We originally tried packaging our ready made meals like lasagnas and cottage pies in another brand of foil trays, and they just weren't strong enough to hold the shape. But once I tried the Confoil Smoothwall trays, I said 'get me a box of these - they're terrific!'"

- Dale Newberry, Kawungan Quality Meats

# Dualpak Ready Meal Trays

## Product Footprint

-  Made from FSC certified pressed paperboard with a practical PET lining. The PET lining can be removed from the paperboard at waste facilities (where the facilities are available), allowing both the paperboard and the PET lining to make its way through the full recycling process. The PET liner of the tray provides the ideal liquid barrier and allows you to make, store and serve food in this versatile “all rounder” container.

## Lid Compatibility

-  Heat Sealable  
Designed to be used with heat sealing machinery and a compatible film lidding.
-  Clip-On Lids  
Available with specific containers.

## Suited for

# Dualpak Ready Meal Trays

Make, Store, Serve

Meet the ultimate all rounder meal tray...

Made from FSC certified, sustainably sourced virgin fibre pressed paperboard, our Dualpak tray features natural insulation properties that make it highly adaptable to a wide variety of conditions. The Dualpak tray is extremely versatile and can be frozen, chilled, heated in the oven or microwave, and even doubles as a beautiful and functional tray to prepare food directly in and display for sale.

The Dualpak tray is the go-to choice for many leading food manufacturers and is a favourite in the ready meals space due to its broad appeal and list of product features.

With a fully printable surface, Dualpak trays can be easily customised with your own distinct branding. A great opportunity to showcase your brand and stand out from the crowd!

### Why our customers love Dualpak Ready Meals Trays

"We came across Confoil's Dualpak product which offers the very type of multipurpose applications our business was seeking. As Tracey explains "we wanted to avoid the usual hard plastics which you can see a lot of in this space. The ability to both freeze and oven bake the Dualpak containers was an important consideration for us and provides the essential convenience for our customers." Being an Australian based manufacturer was also major benefit when choosing the Dualpak containers, Tracey says, "the local responsiveness and customer service has been a major influence in the relationship we have built with Confoil".

**- Tracey Emney, We Feed You**

# Pulp Meal Trays

## Product Footprint

-  Made from 100% compostable and sustainable wheatgrass with a practical PET lining. The PET lining can be removed from the wheatgrass pulp at waste facilities where available, allowing both the pulp tray and the PET lining to make its way through the full recycling process. The PET liner of the tray provides the ideal liquid barrier and allows you to make, store and serve food in this versatile meal tray range.

## Lid Compatibility

-  Heat Sealable  
Designed to be used with heat sealing machinery and a compatible film lidding.

# Pulp Meal Trays

## For Makers of Good Food

Perfect for prepared meals and condiments. Made from a sturdy wheatgrass base tray, our pulp trays offer a multi-cavity and separated solution for food preparation and are designed to be heat sealable. Pulp trays can be frozen, and are microwavable.

Pulp meal trays are a popular choice for food manufacturers, the ready meals market, as well as meals on wheels services and the healthcare industry.

### Eco Tip!

Did you know that under the right conditions, compostable packaging can be broken down in as little as 12 weeks? Compostable packaging is designed to be broken down in an industrial composting facility or through home composting systems where the surrounding conditions support breakdown.

# Pulp Cups

## Product Footprint

 Made from 100% compostable and sustainable wheatgrass, our pulp portion cups are not lined or coated with plastic at all. When a material is compostable it means that the item has the ability to break down in under 12 weeks, making it suitable for commercial and home composting together with food waste. The item is then transformed into nutrient rich compost that helps plants to thrive. Our pulp cups are an excellent environmentally responsible choice and a great alternative to single-use plastic serving cups.

### Eco Tip!

Compostable packaging does not need to be separated from food scraps or cleaned after use? Compostable packaging is specifically designed to be broken down under the right conditions together with food waste. Both food waste and the packaging can share the same bin, leaving bins for recycling materials clean and free of food contamination.

# Pulp Produce Trays

## Product Footprint

 Made from 100% compostable and sustainable wheatgrass, our pulp produce trays are not lined or coated. When a material is compostable it means that the item has the ability to break down in under 12 weeks, making it suitable for commercial and home composting together with food waste. The item is then transformed into nutrient rich compost that helps plants to thrive. Our pulp produce trays are an excellent environmentally responsible choice for the sale and display of fresh produce and a great alternative to single-use plastic trays.

## Pulp Produce Trays

### For Makers of Good Food

Good looks meet practical design. Perfectly suited to green grocers, supermarkets and produce farmers for displaying fresh fruit and vegetables, with a well considered design which includes ribbed embossing and an engineered flange that adds just the right amount of strength and rigidity to the tray in order to hold weight well.

Made from 100% compostable and sustainable wheatgrass, our pulp produce trays are not lined or coated with plastic and provide a fantastic, responsible alternative to plastic produce trays.

### Eco Tip!

When compostable packaging is broken down after use as compost, it is transformed into nutrient rich food for plants and trees to thrive! Amazing right? Not only are we saving our planet from more waste, we are turning that waste into something beneficial. It's a win-win.

# Parchment Muffin Wraps

## Product Footprint

 Made from 100% parchment paper, our parchment muffin wraps are certified OK compostable. When a material is compostable, it means that it has the ability to break down completely in under 12 weeks under the right conditions, making it suitable for commercial and home composting together with general food waste. The item is then transformed into nutrient rich compost that helps plants to thrive and leaves nothing harmful to the environment behind.

# Paper Baking Moulds

## Product Footprint

 Our paper baking moulds are made using 100% biodegradable paper that is carefully selected using high quality natural materials. Biodegradable items typically break down in one year or less - which is great news for our planet! Confoil's beautiful range of paper baking moulds are made from sustainably sourced virgin fibre wood that is FSC Chain of Custody certified, so you can rest assured that its procurement adheres to sustainable forestry practices.

# Catering Supplies

## Product Footprint

 Our foil rolls and pop-up sheets are 100% recyclable and renewable. Aluminium foil itself can be melted down and reformed an endless amount of times without any compromise to its structural properties. Confoil advise that you make every effort to clean foil and to bundle foil sheets into larger balls to ensure that it has the best chance of being picked up during the recycling process.

Our baking sheets and rolls are made from 100% genuine vegetable parchment that is both compostable and biodegradable, making it conveniently suitable to dispose of after use together with food scraps.

#### Eco Tip!

Composting has become increasingly important as we see the impact that single use plastic consumption has had on our environment.

Composting is a great alternative to landfill and we are seeing a rapid expansion of the commercial composting networks across the world as this is recognised. When an item goes to landfill it produces harmful methane as it decomposes, but when an item is composted, it instead creates nutrient rich food to benefit plants and soil.

# Heat Sealing Machinery

## Heat Sealing Machinery

### For Makers of Good Food

Confoil's range of heat sealing machinery and sealing films are designed with your busy kitchen in mind.

Ideal for hospitals and healthcare facilities, schools, correctional services and ready meals manufacturers, our range is created for makers of good food.

With both manual and automated systems available, you are sure to find a machine to suit your needs. Our heat sealing machinery is compatible with both our Dualpak and pulp meal tray ranges.

Compatible with  
our Dualpak + Pulp  
Meal Trays!

#### Rotopak Manual Sealing Machine

A compact and convenient manual benchtop sealing machine. This tray sealer machine provides temperature control and is suitable for Dualpak trays (suitable tray carriers available on request). Constructed of easy-to-clean stainless steel. This machine can seal Dualpak sizes up to DP6100 and DP6111.

#### 1308 Manual Sealing Machine

A user-friendly manually-operated benchtop sealing machine. It seals and cuts film in one easy step, allowing for the sealing of 6-8 trays per minute. Using continuous film rolls, the self-aligning heat plate ensures a complete and even seal. This machine features a compact design and is constructed of easy-to-clean stainless steel and anodized aluminium. Suitable for Dualpak and Pulp Trays. Please note the largest possible tray size accommodating with this machine is the Dualpak 6170.

#### Rapida Sealing Machine

A semi-automatic benchtop sealing machine with a profile cut and the option of creating an easy peel angle to facilitate the tray opening. This tray sealer provides digital temperature control has adjustable sealing time, and is suitable for sealing Smoothwall, Dualpak and Pulp Trays. Constructed of easy to clean stainless steel, aluminium and polythene.

#### 1980E In-Line Sealing Machine

The efficient intermittent-motion of the 1980E sealing machine allows for sealing of between 5-27 trays per minute. Using continuous film rolls, trays are automatically discharged with an adjustable discharge shelf. This sealing machine also offers adjustable dwelling time and sealing platen force. Simple to operate, the continuous film rolls allows for quick meal preparation. Constructed of easy-to-clean stainless steel and anodized aluminium.

## Heat Sealing Film

To compliment our range of Dualpak, Smoothwall and pulp meals trays, we also offer associated sealing films which can be used in conjunction with our heat sealing machinery. Heat sealing films provide a strong and hygienic cover for food trays, while providing an easy to open experience for the consumer. Depending on your needs, we have a variety of sizes available.

easy to peel!
